

QUALITY POLICY

We at MITCON strive to achieve customer satisfaction, productivity improvement and reduced rework, keeping Sustainable Development Goals (SDGs) at the core of offering, considering the context of the organization, abiding by legal requirement, through effective implementation and continuous improvement in Quality Management System

- a) Provide consultancy and engineering services in the field of energy transition, environment engineering, infrastructure projects, biofuels & green chemistry and business advisory.
- b) Provide skill & entrepreneurship development training.

VISION

- To build a profitable and sustainable business, provide personal growth and have a long-lasting professional relationship with “sustainability” at core of its existence.
- Our philosophy – Doing small things innovatively and effectively that contribute in creating sustainable tomorrow.
- To be one of the leading consultants with SDGs at the core of offering.

MISSION

- To enable our clients, meet their sustainability objectives.
- Maximize clients ‘Return on Investment’ through commitment to innovative business process management, service excellence, dedication, determination, discipline, deadlines and efficient use of time, material and human resources.
- Maintain quality standards in various aspects of business at all stages to ensure that things are done right at the first time. The delays, duplication of work and wastage are eliminated from operations which in turn shall benefit the clients.
